As we develop our FYSPRT and identify needs in our community, it becomes more and more important to have all of you at the table.

We are working on what we believe is going to be an exciting project of developing a digital message sharing our communities voice. You are all really important in this work and we appreciate your presence and input.

Getting youth and family to the table is at the heart of all we do and we would ask all of you to invite youth and families to join us for food ,fellowship and participation in meaningful work for our community.
